TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, SQL, HTML/CSS
Databases: Oracle SQL, PostgreSQL, MySQL, MongoDB, PL/SQL
Data Manipulation & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI, (Learning) PySpark
Frameworks: React, Django, Redux, Node.js, Express, WordPress, Material-UI, Bootstrap, Tailwind CSS
Dev Tools: Git, GitHub, Jupyter Notebook, Google Collab, VS Code, DataGrip, PyCharm, IDEA, Postman, Jira
Other Skills: Windows, Linux/Unix (Ubuntu, CentOS), Shell Scripting, Microsoft Excel, Google Sheets

PROFESSIONAL EXPERIENCE

Software Engineer | *Oracle SQL, MS Excel, Python, Bash/Shell Scripting, Java, Linux, Jira* Jul 2022 – Mar 2024
Vermont Information Processing *Mumbai, India*

- Ensured data integrity by performing cleaning, preprocessing and validation in **Oracle SQL** and **MS Excel**, resolving 95% of data quality issues, and providing detailed analysis reports for price plans, reimbursements and chargebacks.
- Reduced issue resolution time by 40% for 100+ customer-reported issues by performing in-depth root cause analysis (RCA) on legacy app server and Oracle database, leading to faster issue identification and customer satisfaction.
- Automated ETL workflows by implementing **Bash/Shell** scripts, optimizing data workflows, and reducing manual interventions by 20%, which led to improved data onboarding efficiency.

PROJECTS

Loan Insights Dashboard | *Power BI, SQL, Data Visualization, Dashboard Design, Financial Analytics, Git* Jan 2025
[GitHub](#)

- Developed an interactive loan data analysis dashboard using **Power BI** and **SQL**, enabling real-time insights into financial metrics, borrower behavior, and loan performance.
- Enhanced data visualization and reporting by implementing dynamic **KPI** tracking, trend analysis, and loan classification, improving financial strategy planning.
- Optimized loan performance tracking by improving **data processing** and designing **interactive dashboards**, enabling better risk assessment and lending pattern identification.

Predictive Caching for Web Pages | *Python, Pandas, Matplotlib, Statsmodels, Scikit-learn, Git* Nov 2024
[GitHub](#)

- Created a hybrid AI-driven caching system combining **ARIMA** for time-series forecasting and LLM for contextual analysis, improving cache efficiency and reducing latency.
- Improved data quality by automating data preprocessing, normalization, and missing value imputation using **Python** and **Pandas**, ensuring high-quality inputs for predictive models.
- Conducted exploratory data analysis (EDA) on web traffic data, identifying trends such as average daily and monthly page views, and visualized key insights using **Matplotlib**
- Built and optimized ARIMA models to forecast future page views, achieving high accuracy with RMSE values of **4.41** for ARIMA and **4.67** for Auto-ARIMA, and generated forecasts for the next 30 days.

Stress Level Prediction Using Machine Learning | *Python, Pandas, Matplotlib, Seaborn, Scikit-learn, Git* Nov 2024
[GitHub](#)

- Developed a stress prediction model for a mobile app by analyzing user behavior metrics, optimizing and training ML models on digital wellbeing data including screen time, gaming time, app usage, and social media activity.
- Improved data quality by implementing data preprocessing, encoding, and normalization using **Python** and **Pandas**, ensuring high-quality inputs for predictive modeling.
- Trained and enhanced model performance by optimizing **Random Forest** and **XGBoost** hyperparameters, increasing classification, increasing accuracy to **77%**.

EDUCATION

University of Windsor Windsor, ON
Master of Applied Computing (Grade: 85.53%) May 2024 – Present

University of Mumbai Mumbai, India
Bachelor of Engineering - Computer Engineering (CGPA: 8.58/10) Aug 2018 – May 2022
