Aaryen DSouza

437-966-6119 | dsouza96@uwindsor.ca | linkedin.com/in/aaryendsouza | github.com/aaryen-dsouza | Portfolio

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, SQL, HTML/CSS Databases: Oracle SQL, PostgreSQL, MySQL, MongoDB, PL/SQL Data Manipulation & Visualization: Pandas, NumPy, Tableau, Power BI

Frameworks: React, Node.js, Express, WordPress, Material-UI, Bootstrap, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, DataGrip, PyCharm, Postman, Microsoft Excel, Google Sheets

Other Skills: Windows, Linux/Unix (Ubuntu, CentOS), Shell Scripting

EXPERIENCE

Software Engineer | Oracle SQL, MS Excel, Bash/Shell Scripting, Java, JavaScript Vermont Information Processing (Acquired Vistaar US in July 2023)

July 2022 – Mar 2024 Mumbai, India

- · Ensured data integrity by conducting data cleaning, preprocessing and validations through Oracle SQL and MS Excel, resolving 95% of data quality issues within 24 hours, and providing detailed analysis reports to stakeholders.
- Reduced issue resolution time by 40% for 100+ customer-reported issues by performing in-depth root cause analysis (RCA) on legacy app server and Oracle database, leading to faster issue identification and customer satisfaction.
- Automated ETL workflows by implementing Bash/Shell scripts, optimizing data workflows, and reducing manual interventions by 20%, which led to improved data onboarding efficiency.

PROJECTS

Predictive Caching for Web Pages | Python, Pandas, Matplotlib, Statsmodels, Scikit-learn, Git

Nov 2024

- GitHub
 - Developed a hybrid AI-driven caching system combining ARIMA for time-series forecasting and LLM for contextual analysis, improving cache efficiency and reducing latency.
 - Improved data quality by automating data preprocessing, normalization, and missing value imputation using Python and Pandas, ensuring high-quality inputs for predictive models.
 - Conducted exploratory data analysis (EDA) on web traffic data, identifying trends such as average daily and monthly page views, and visualized key insights using Matplotlib
 - Built and optimized ARIMA models to forecast future page views, achieving high accuracy with RMSE values of 4.41 for ARIMA and 4.67 for Auto-ARIMA, and generated forecasts for the next 30 days.

Stress Level Prediction Using Machine Learning | Python, Pandas, Matplotlib, Scikit-learn, Git GitHub

Nov 2024

- - Developed a stress prediction model for a mobile app by analyzing user behavior metrics, optimizing and training ML models on digital wellbeing data including screen time, app usage, and social media activity.
 - Improved data quality by implementing data preprocessing, encoding, and normalization using **Python** and **Pandas**, ensuring high-quality inputs for predictive modeling.
 - Trained and enhanced model performance by optimizing Random Forest and XGBoost hyperparameters, increasing classification, increasing accuracy to 77%.

Bus Pass Scanner | React, NodeJs, Express, MongoDB, Material UI, Git

Mar 2022

- GitHub
 - Designed and developed a cross-platform bus pass authentication application as part of a 3-member team, enhancing security and efficiency in college transportation.
 - mplemented a dynamic, responsive UI using React and Material UI, improving accessibility and user experience across devices.
 - Integrated JWT-based authentication, reducing unauthorized access attempts and strengthening the overall security of the system.

EDUCATION

University of Windsor

Master of Applied Computing

University of Mumbai

Bachelor of Engineering - Computer Engineering

Windsor, ON May 2024 - Present Mumbai, India Aug 2018 - May 2022
